FEATURES

Intuitive and extremely fast pitching (roll out, inflate, finished).

Simultaneous erection of air frame, inner tent and flysheet.

One-Pump System allows complete erection with only one inflation procedure.

Stable and robust air frame with geodesic structure.

The patented Multi Chamber Safety System allows separation of the air frame in two independent air chambers – for emergency stability in case defect of one chamber.

Double-layer air struts.

Two closable ventilation openings at the fly sheet. Two entrances with vestibules for cooking or storage.

Both sides can be rolled up to get a panorama view.

Light and well-ventilated inner tent with no-see-um mesh and storage pockets integrated into the head end.

The entrance of the inner tent can be opened variably by two-way zipper and be used as additional ventilation.
